

1 Event-study estimates by outcome and policy component

This appendix reports event-study estimates from the Callaway and Sant’Anna difference-in-differences specification, estimated separately for each outcome and each liberalization component (Fraser sub-indices and Heritage sub-indices). Each plot shows coefficients and confidence intervals for leads and lags relative to the first period a country is classified as treated for that component, as defined in the main text. The omitted period is $t = -1$.

1.1 GDP per capita growth

Figure 1: Event-study estimates: GDP per capita growth; Fraser, free trade.

Figure 2: Event-study estimates: GDP per capita growth; Fraser, legal system.

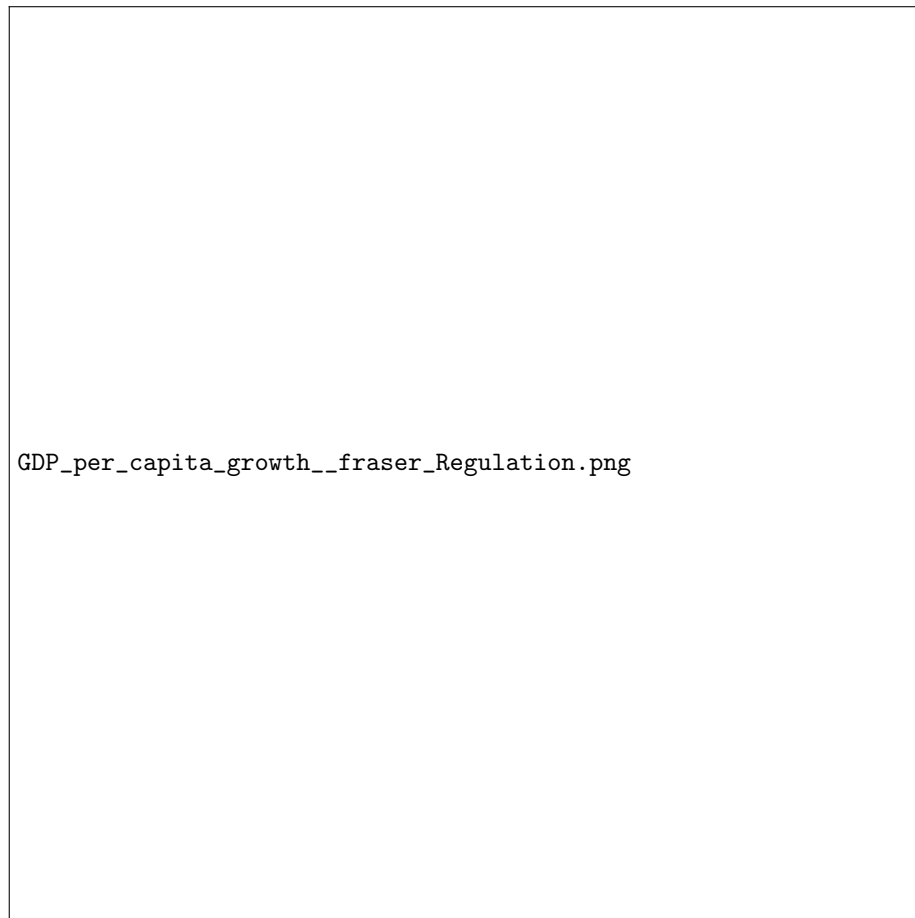

Figure 3: Event-study estimates: GDP per capita growth; Fraser, regulation.

Figure 4: Event-study estimates: GDP per capita growth; Fraser, size of government.

Figure 5: Event-study estimates: GDP per capita growth; Fraser, sound money.

Figure 6: Event-study estimates: GDP per capita growth; Heritage, business freedom.

Figure 7: Event-study estimates: GDP per capita growth; Heritage, financial freedom.

Figure 8: Event-study estimates: GDP per capita growth; Heritage, fiscal health.

Figure 9: Event-study estimates: GDP per capita growth; Heritage, government integrity.

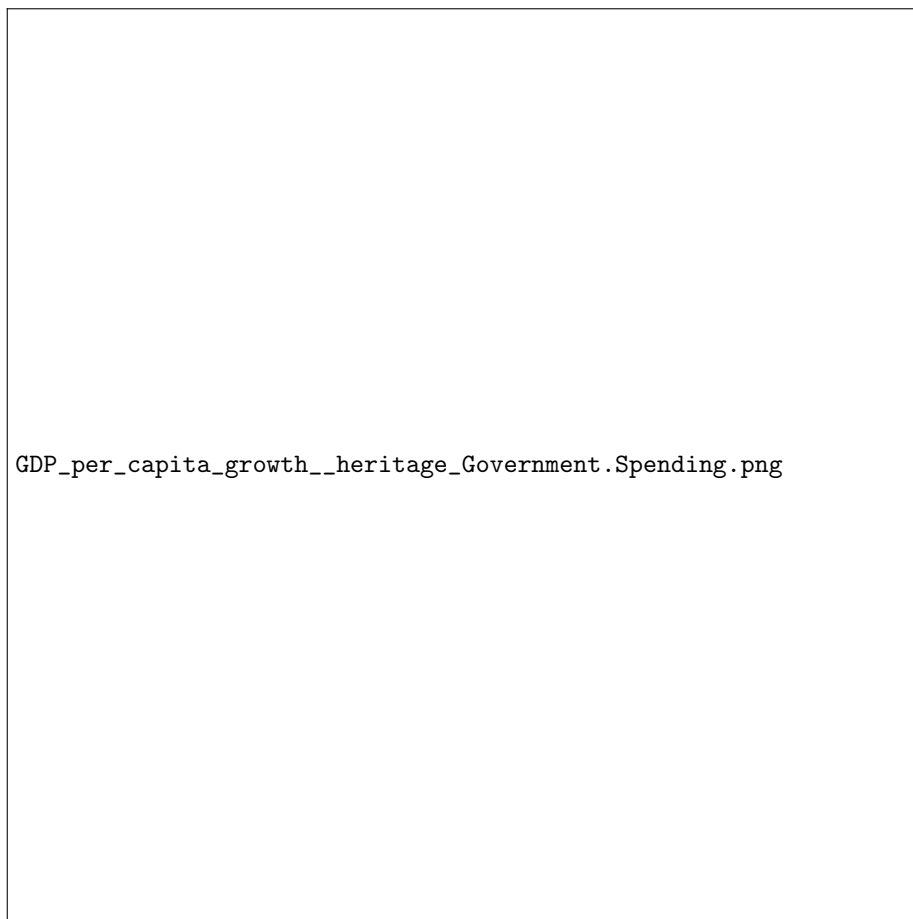

Figure 10: Event-study estimates: GDP per capita growth; Heritage, government spending.

Figure 11: Event-study estimates: GDP per capita growth; Heritage, investment freedom.

Figure 12: Event-study estimates: GDP per capita growth; Heritage, judicial effectiveness.

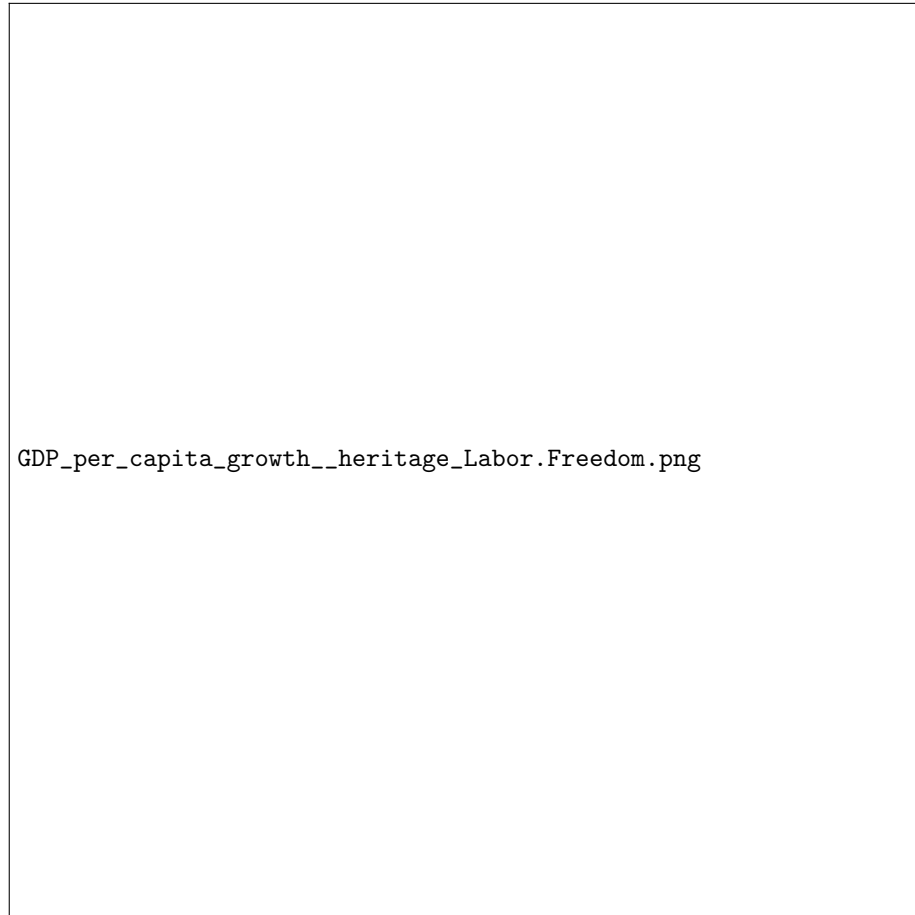

Figure 13: Event-study estimates: GDP per capita growth; Heritage, labor freedom.

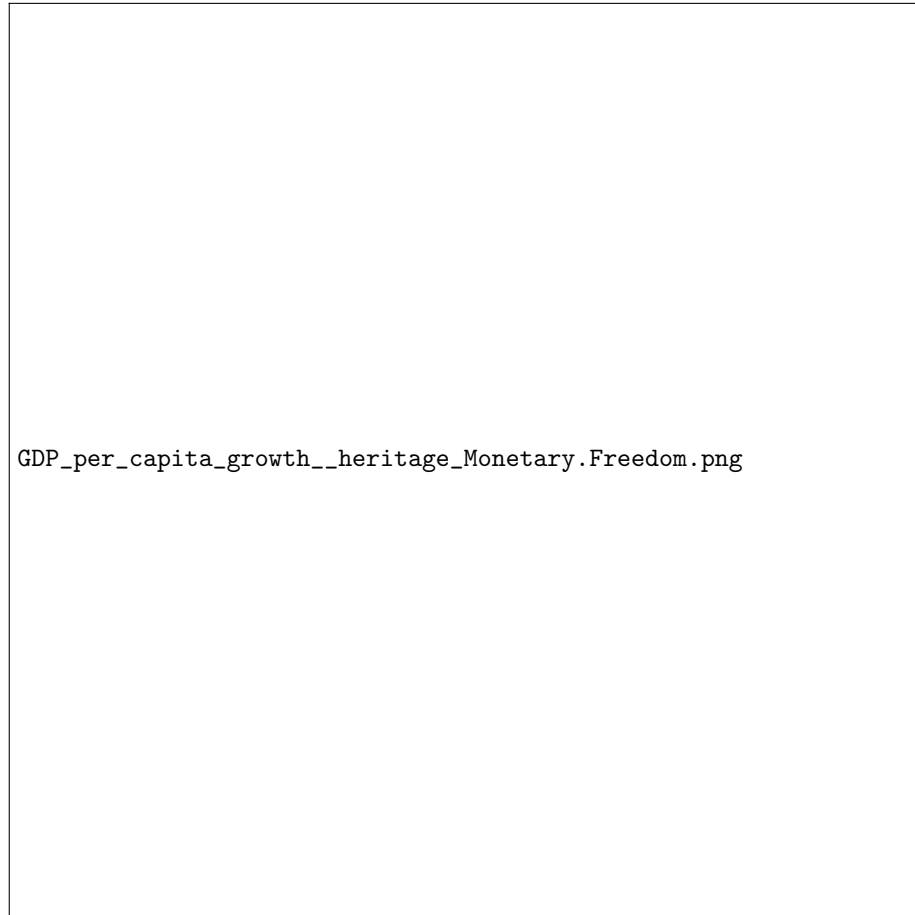

Figure 14: Event-study estimates: GDP per capita growth; Heritage, monetary freedom.

Figure 15: Event-study estimates: GDP per capita growth; Heritage, property rights.

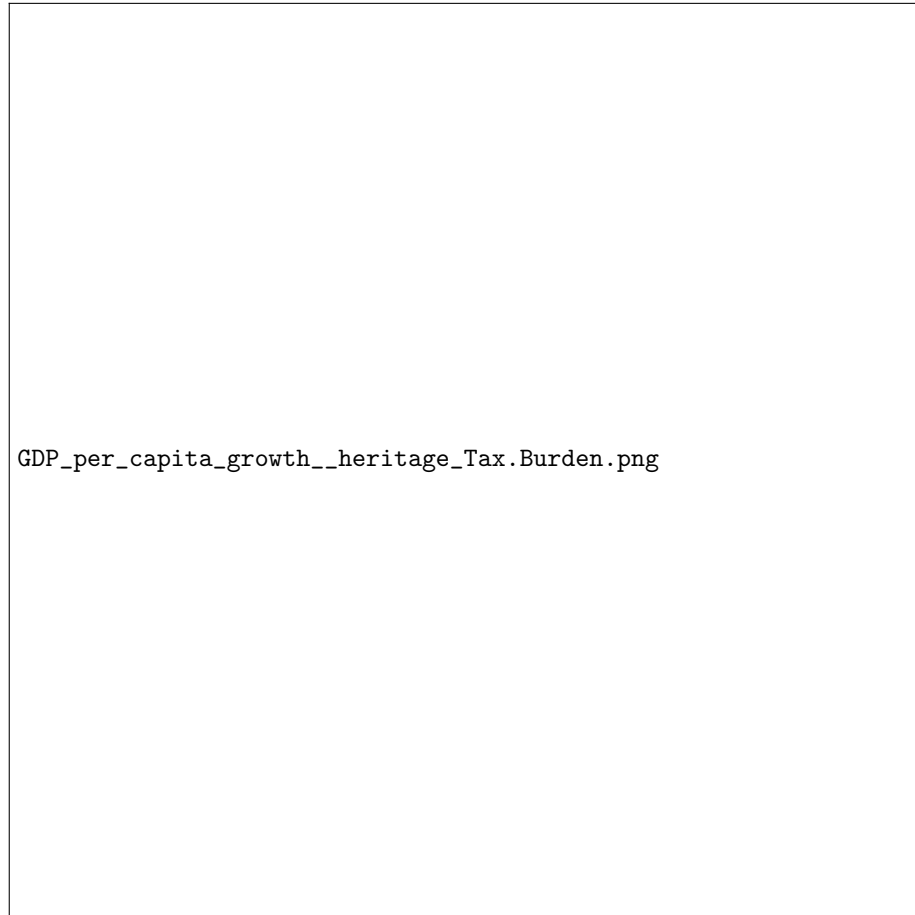

Figure 16: Event-study estimates: GDP per capita growth; Heritage, tax burden.

Figure 17: Event-study estimates: GDP per capita growth; Heritage, trade freedom.

1.2 Gini coefficient (SWIID)

Figure 18: Event-study estimates: Gini (SWIID); Fraser, free trade.

Figure 19: Event-study estimates: Gini (SWIID); Fraser, legal system.

Figure 20: Event-study estimates: Gini (SWIID); Fraser, regulation.

Figure 21: Event-study estimates: Gini (SWIID); Fraser, size of government.

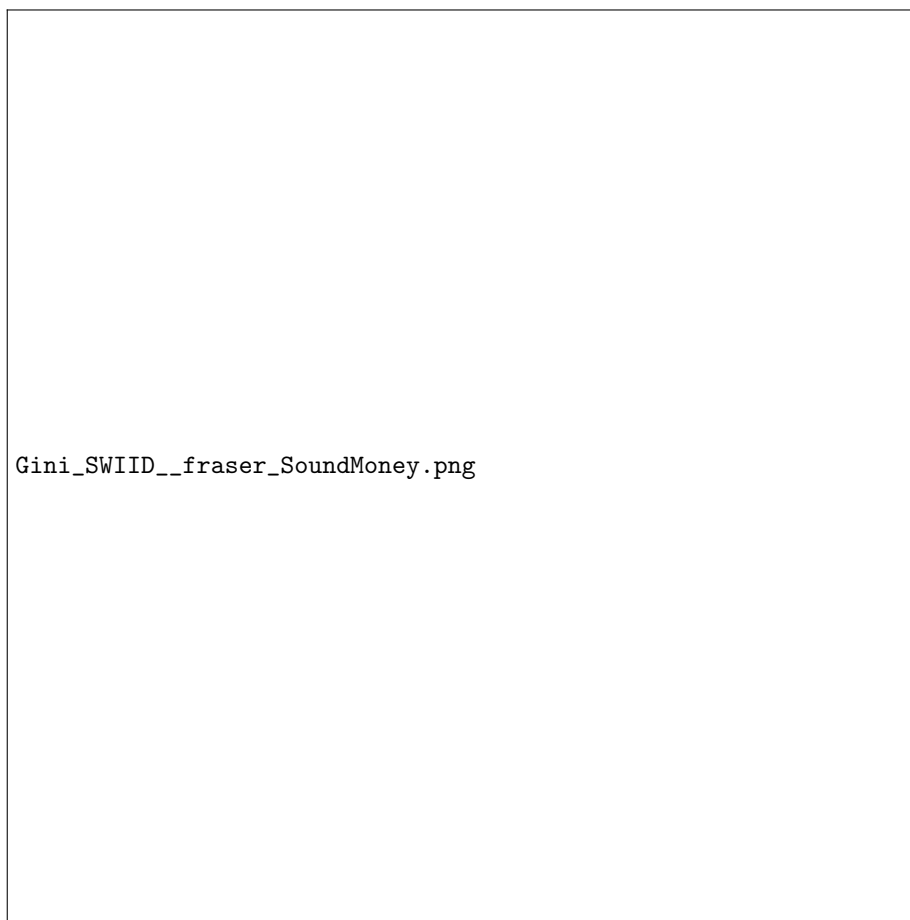

Figure 22: Event-study estimates: Gini (SWIID); Fraser, sound money.

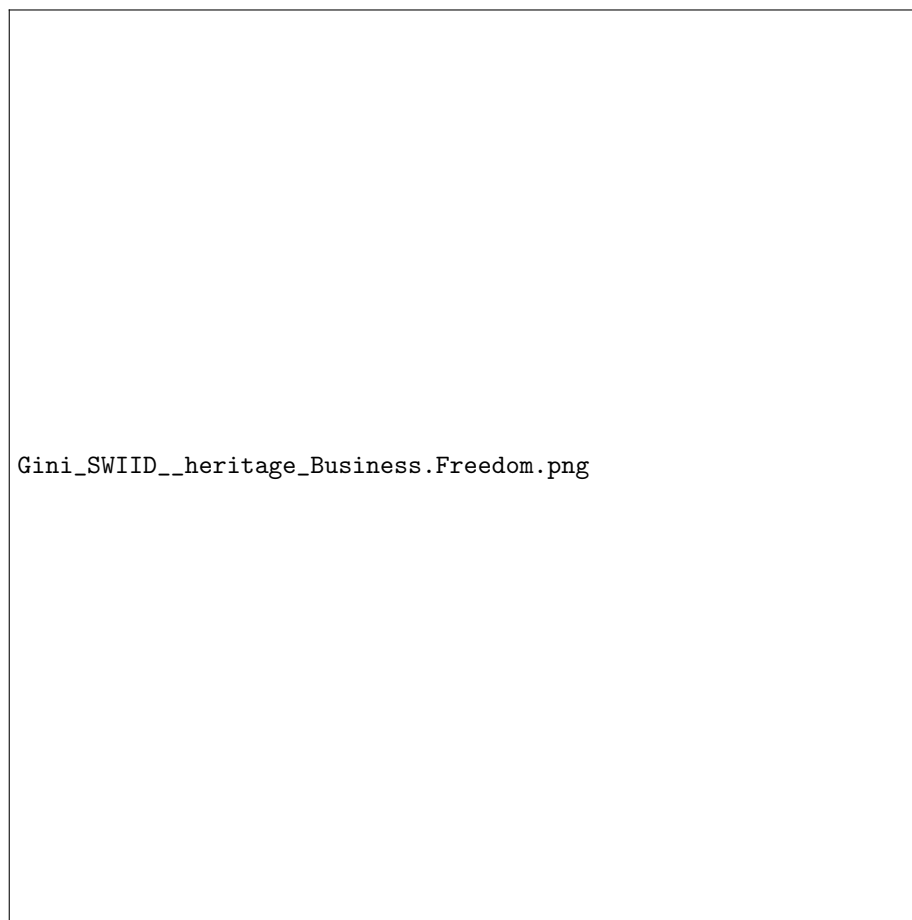

Figure 23: Event-study estimates: Gini (SWIID); Heritage, business freedom.

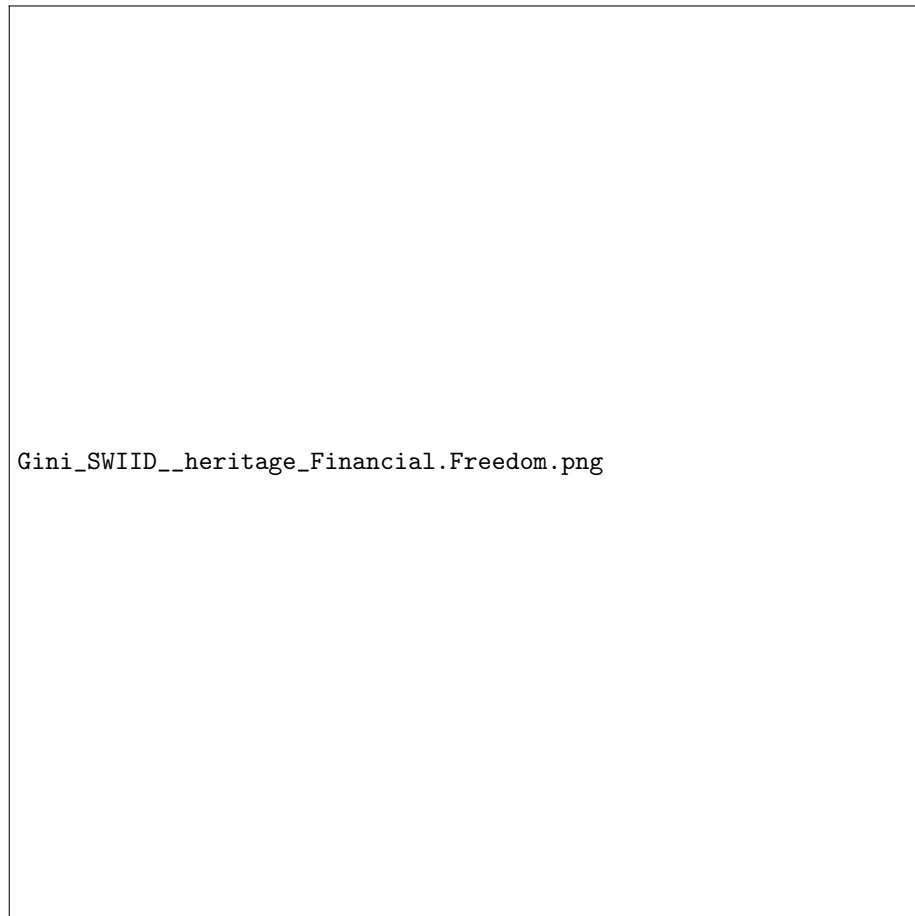

Figure 24: Event-study estimates: Gini (SWIID); Heritage, financial freedom.

Figure 25: Event-study estimates: Gini (SWIID); Heritage, fiscal health.

Figure 26: Event-study estimates: Gini (SWIID); Heritage, government integrity.

Figure 27: Event-study estimates: Gini (SWIID); Heritage, government spending.

Figure 28: Event-study estimates: Gini (SWIID); Heritage, investment freedom.

Figure 29: Event-study estimates: Gini (SWIID); Heritage, judicial effectiveness.

Figure 30: Event-study estimates: Gini (SWIID); Heritage, labor freedom.

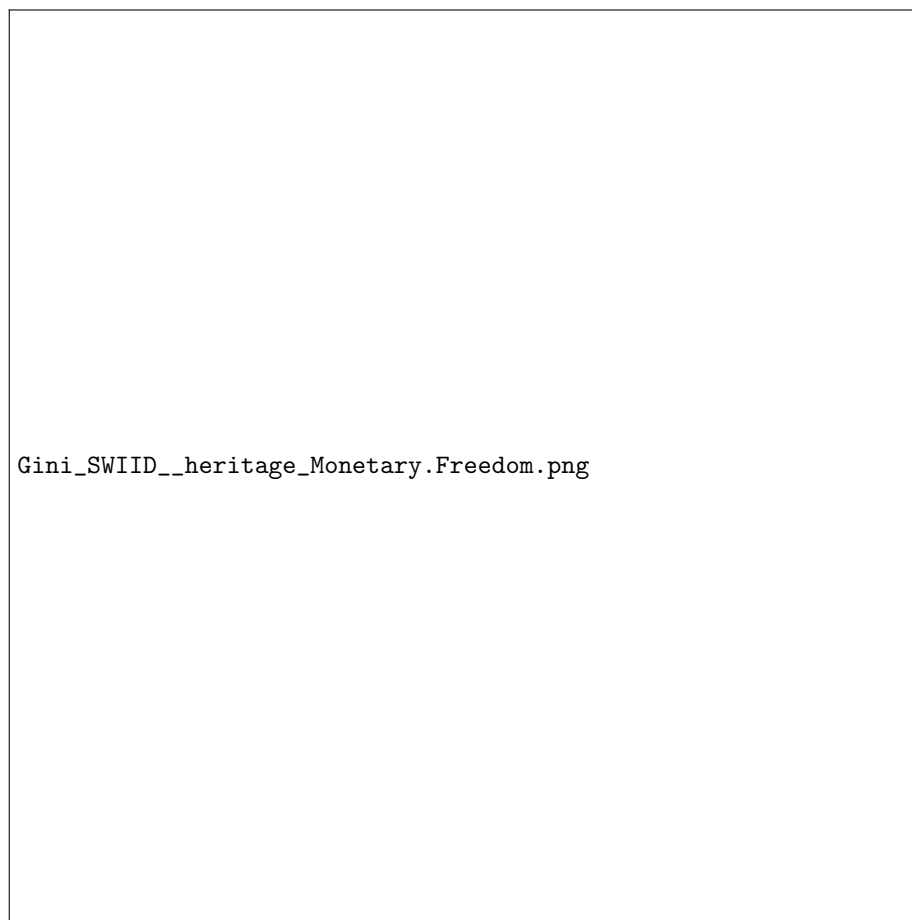

Figure 31: Event-study estimates: Gini (SWIID); Heritage, monetary freedom.

Figure 32: Event-study estimates: Gini (SWIID); Heritage, property rights.

Figure 33: Event-study estimates: Gini (SWIID); Heritage, tax burden.

Figure 34: Event-study estimates: Gini (SWIID); Heritage, trade freedom.

1.3 Income share of the bottom 50% (WID)

Figure 35: Event-study estimates: income share bottom 50% (WID); Fraser, free trade.

Figure 36: Event-study estimates: income share bottom 50% (WID); Fraser, legal system.

Figure 37: Event-study estimates: income share bottom 50% (WID); Fraser, regulation.

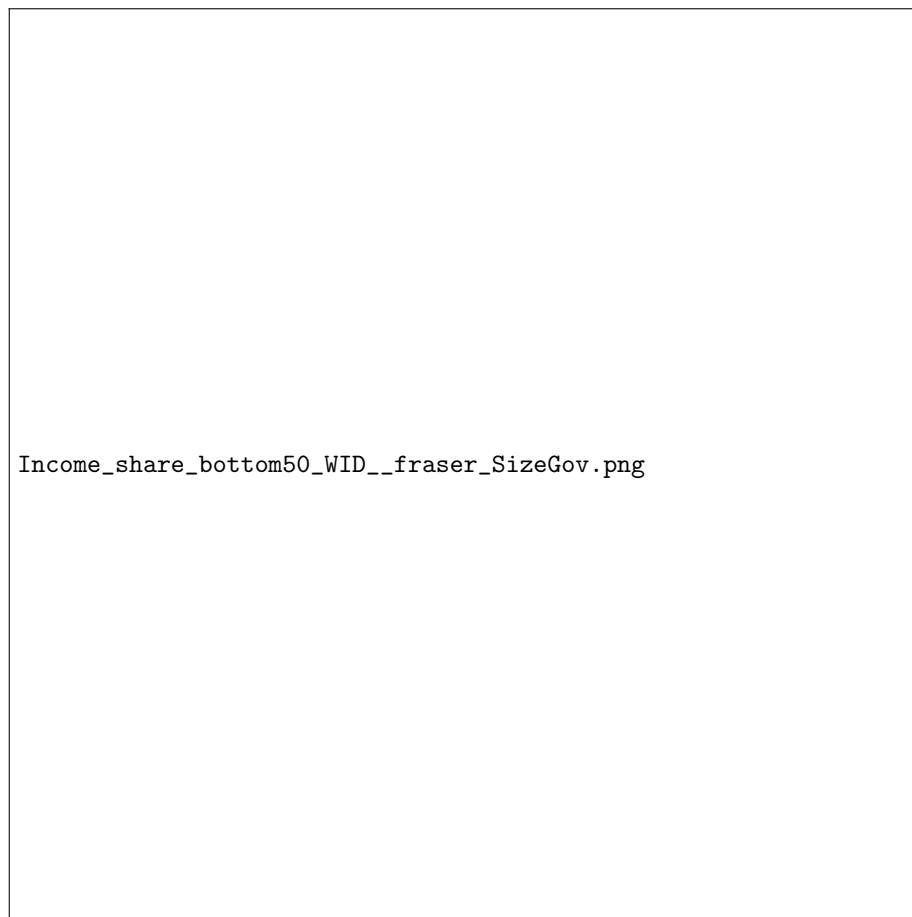

Figure 38: Event-study estimates: income share bottom 50% (WID); Fraser, size of government.

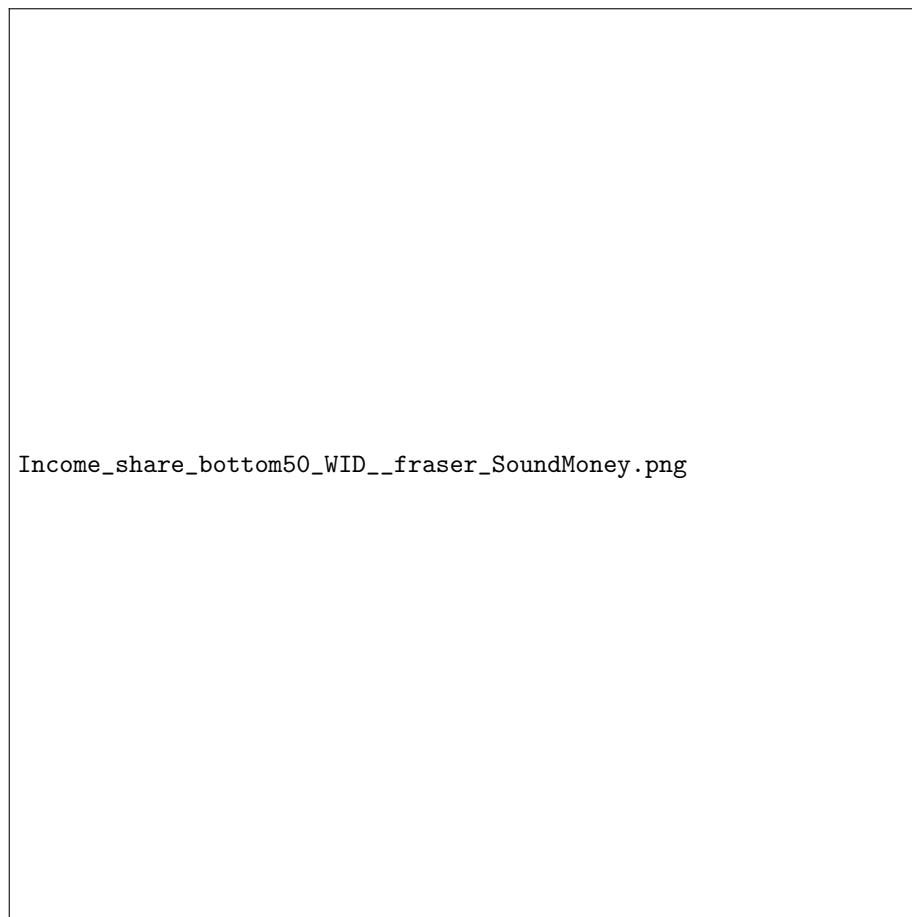

Figure 39: Event-study estimates: income share bottom 50% (WID); Fraser, sound money.

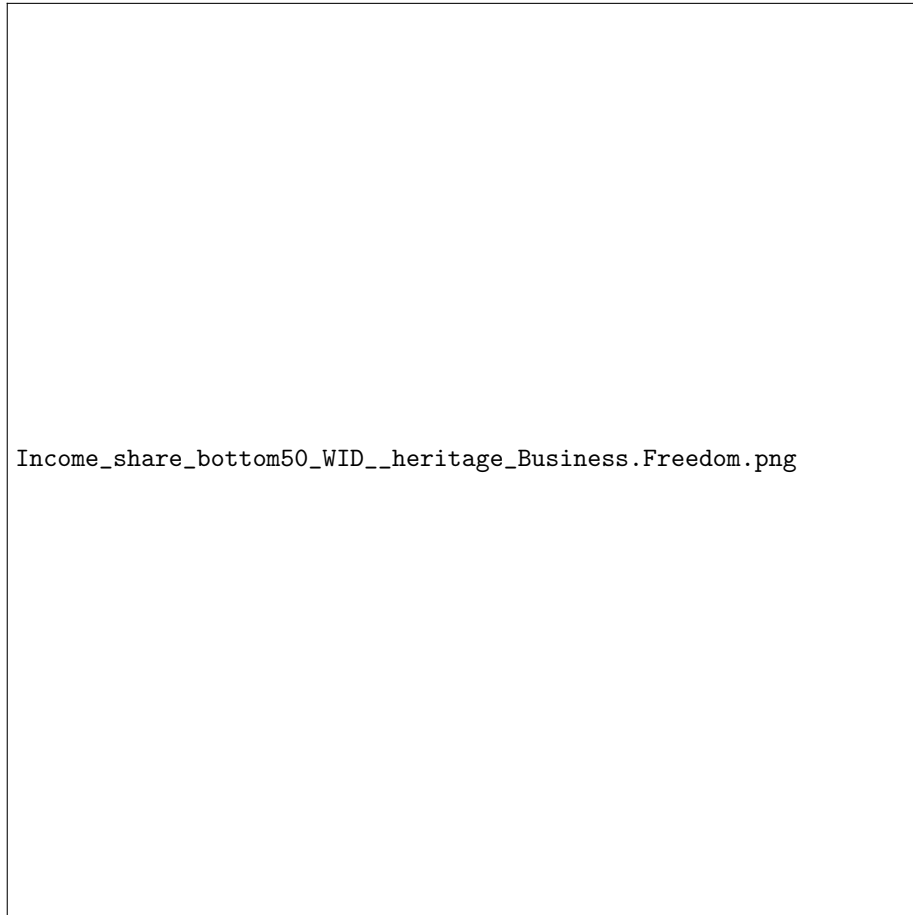

Figure 40: Event-study estimates: income share bottom 50% (WID); Heritage, business freedom.

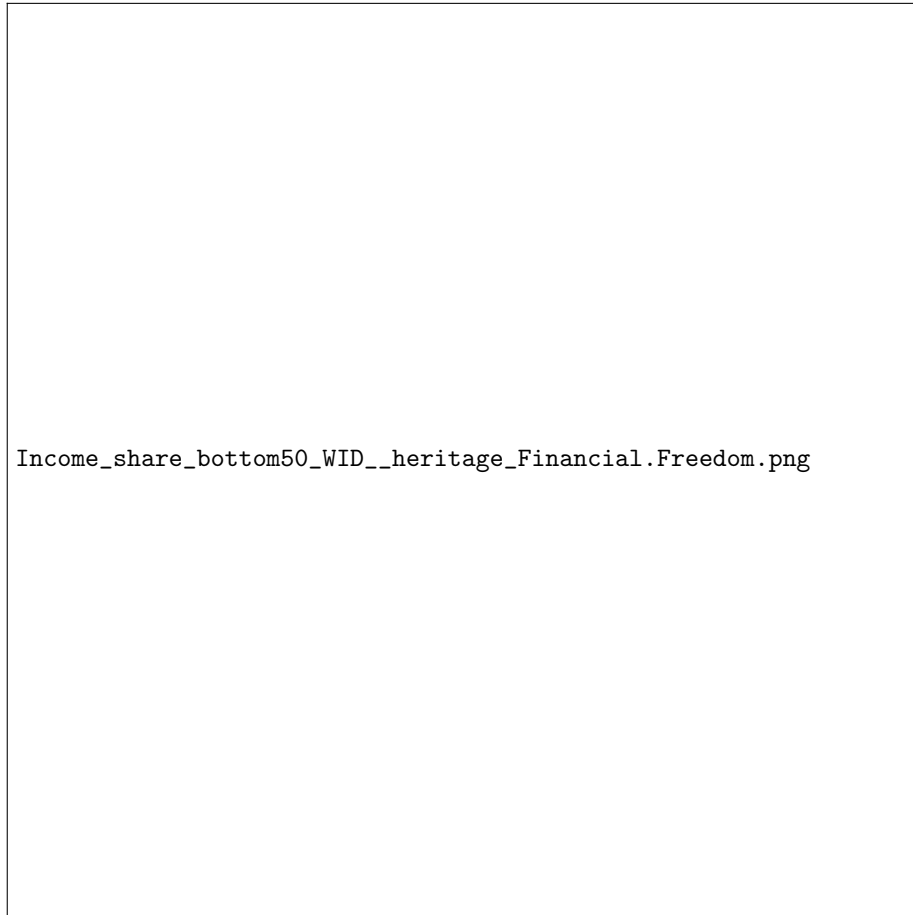

Figure 41: Event-study estimates: income share bottom 50% (WID); Heritage, financial freedom.

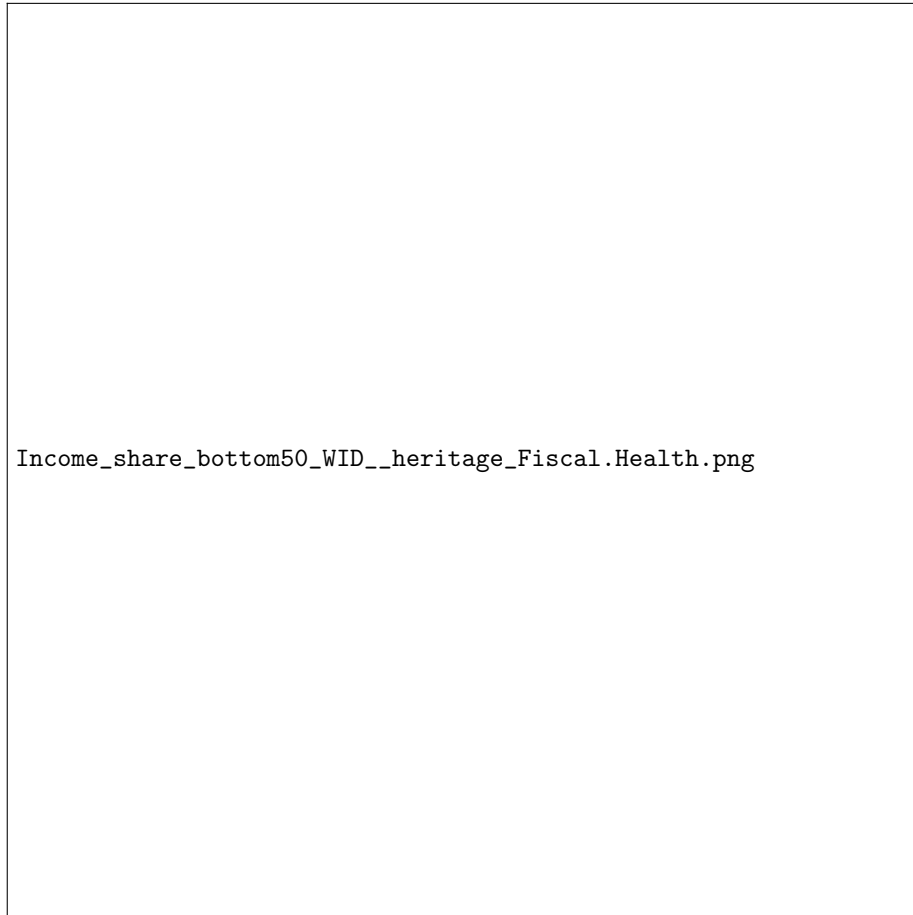

Figure 42: Event-study estimates: income share bottom 50% (WID); Heritage, fiscal health.

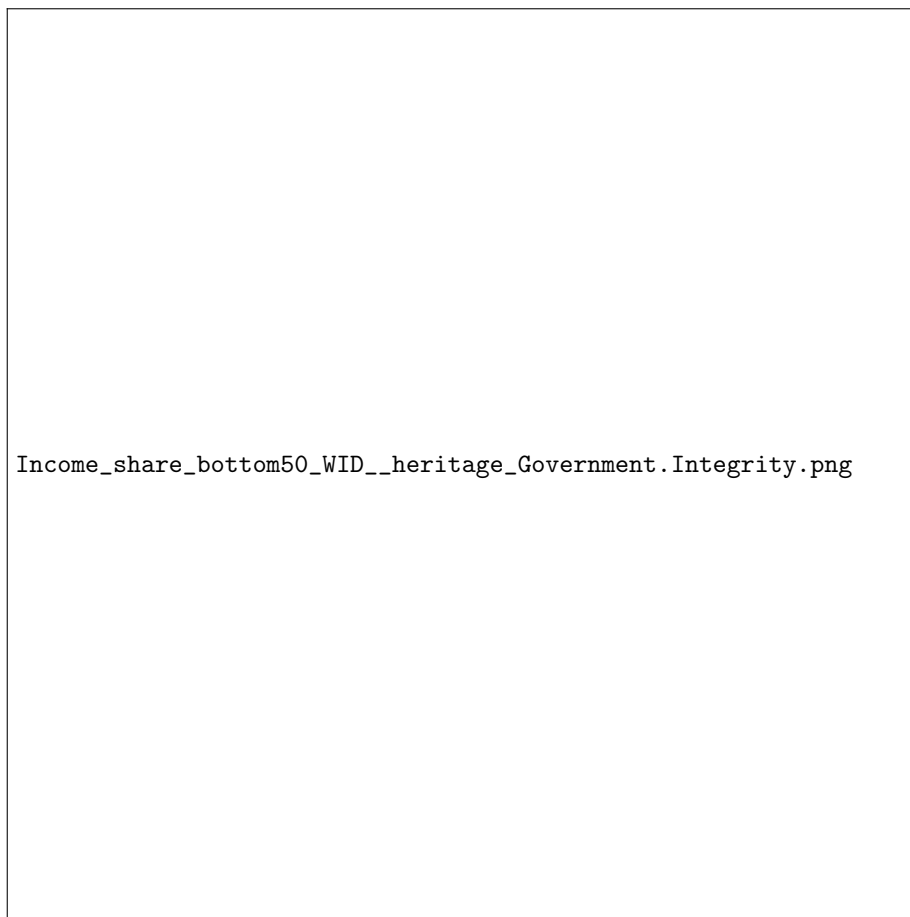

Figure 43: Event-study estimates: income share bottom 50% (WID); Heritage, government integrity.

Figure 44: Event-study estimates: income share bottom 50% (WID); Heritage, government spending.

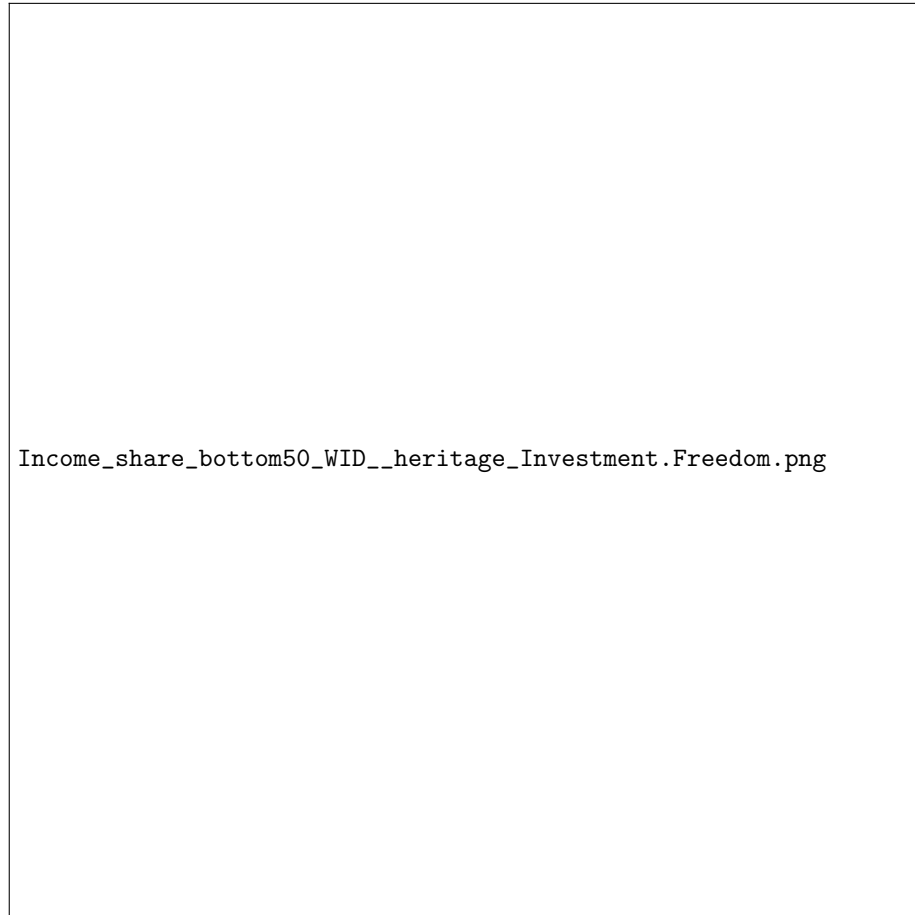

Figure 45: Event-study estimates: income share bottom 50% (WID); Heritage, investment freedom.

Figure 46: Event-study estimates: income share bottom 50% (WID); Heritage, judicial effectiveness.

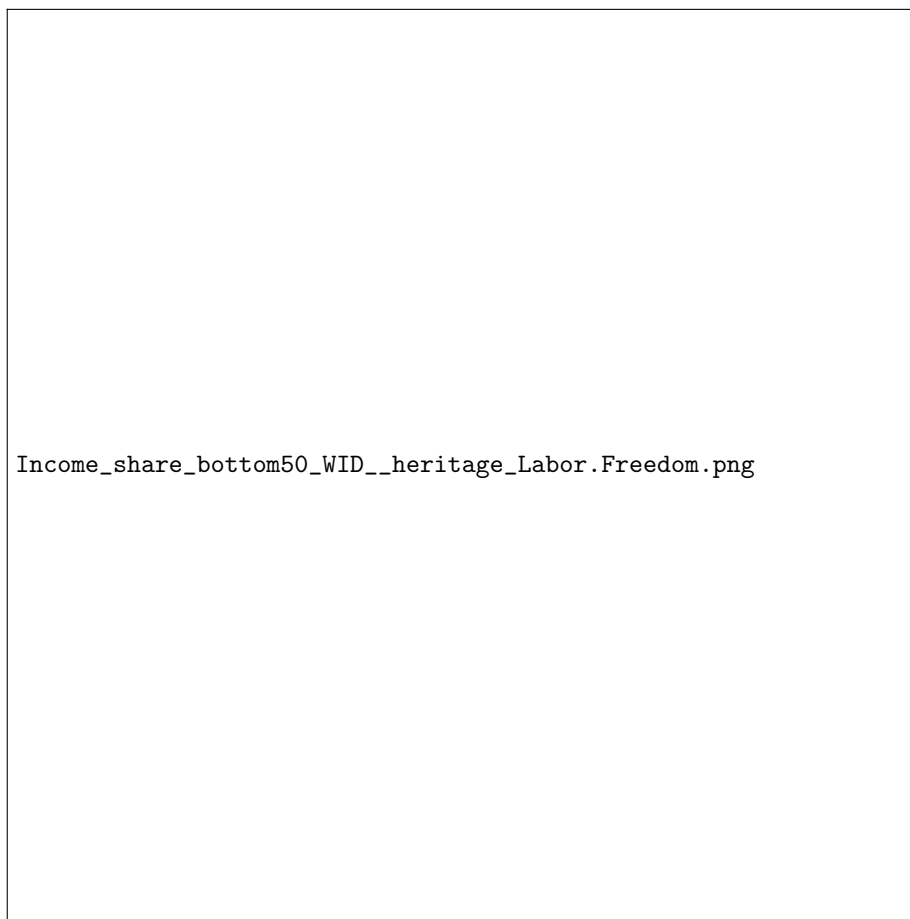

Figure 47: Event-study estimates: income share bottom 50% (WID); Heritage, labor freedom.

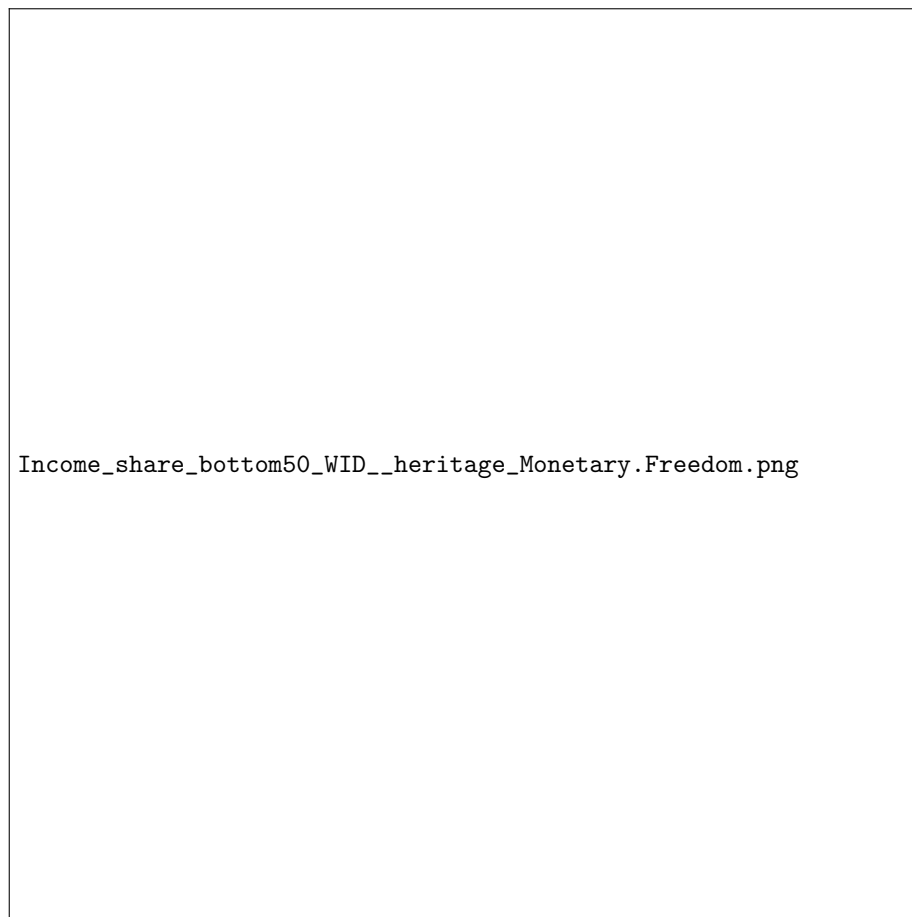

Figure 48: Event-study estimates: income share bottom 50% (WID); Heritage, monetary freedom.

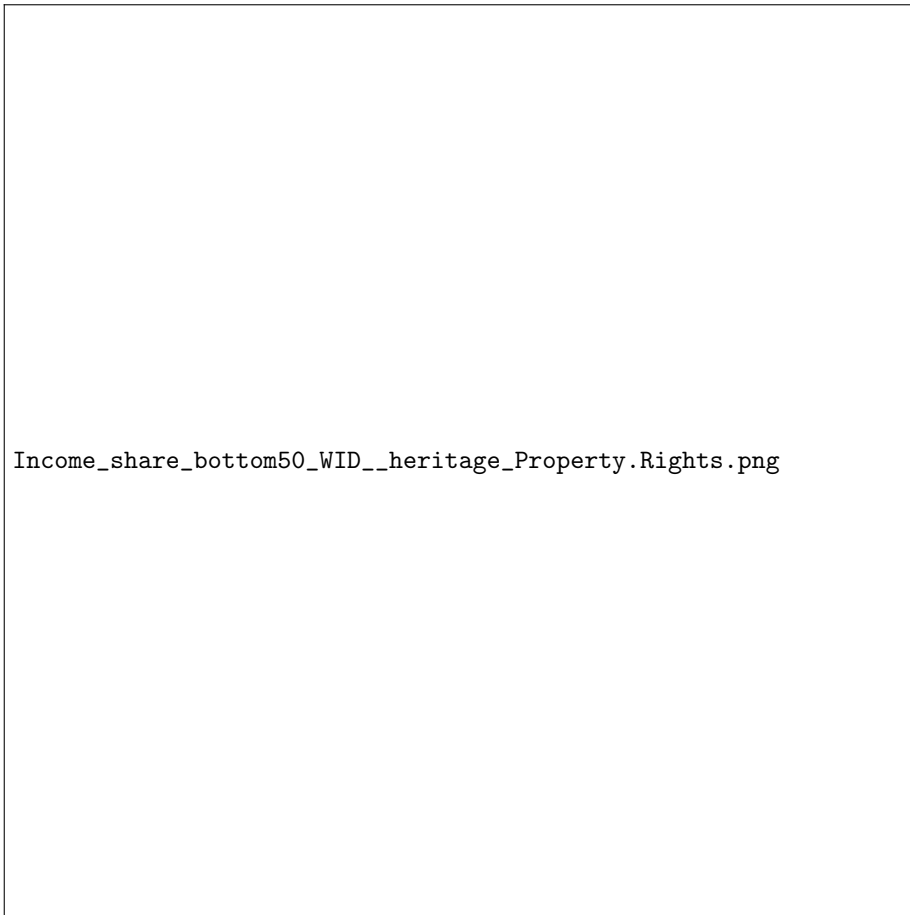

Figure 49: Event-study estimates: income share bottom 50% (WID); Heritage, property rights.

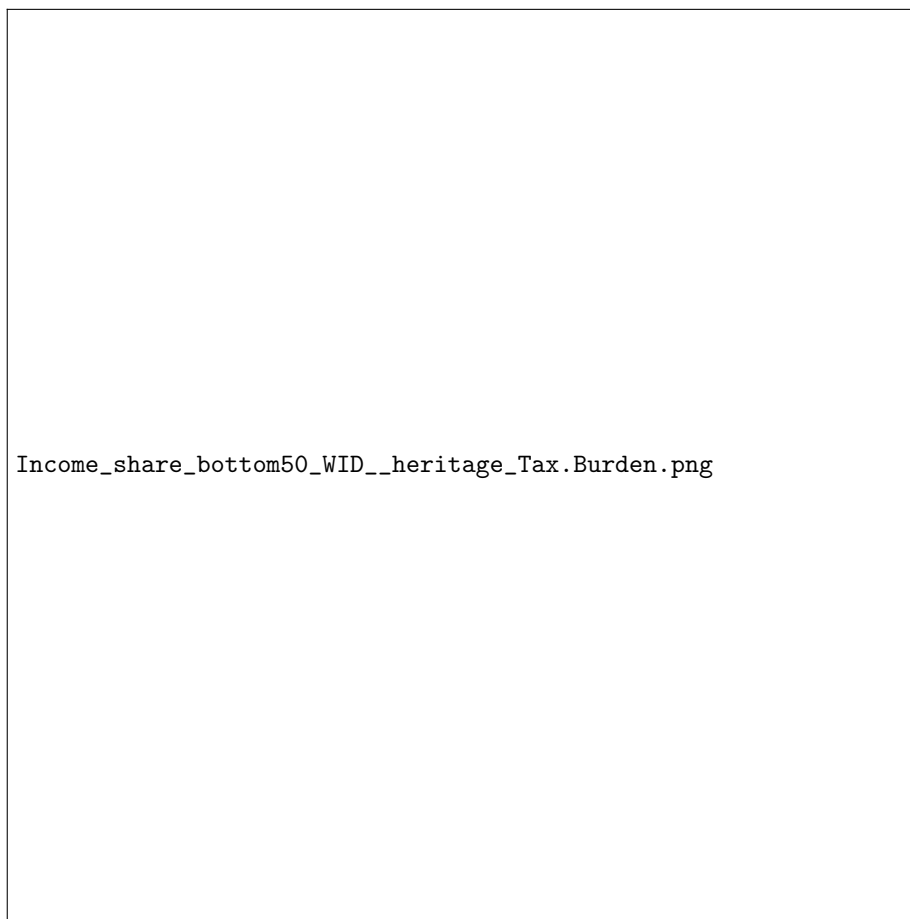

Figure 50: Event-study estimates: income share bottom 50% (WID); Heritage, tax burden.

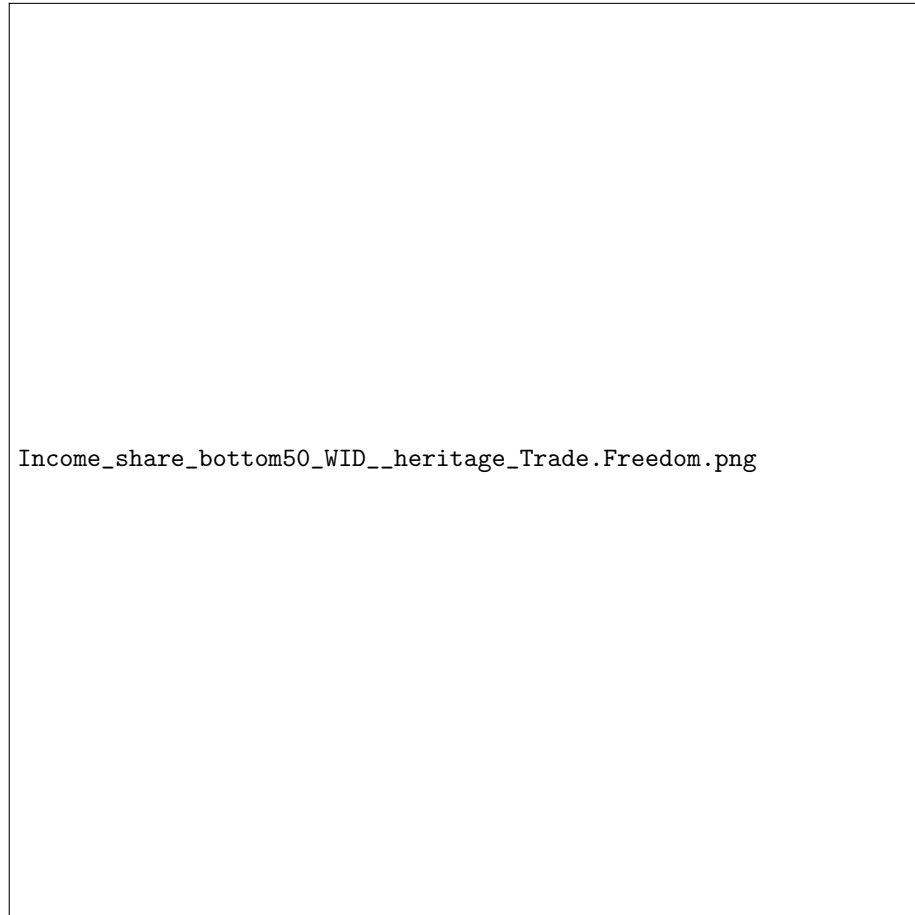

Figure 51: Event-study estimates: income share bottom 50% (WID); Heritage, trade freedom.

1.4 Log under-five mortality

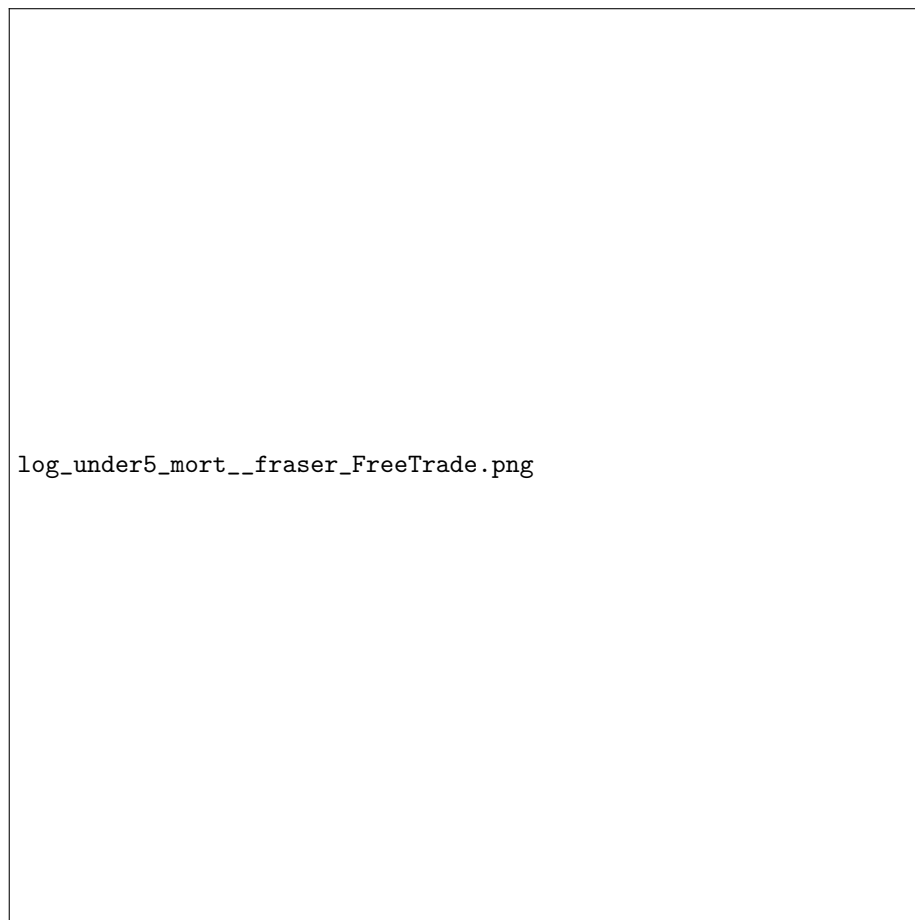

Figure 52: Event-study estimates: log under-five mortality; Fraser, free trade.

Figure 53: Event-study estimates: log under-five mortality; Fraser, legal system.

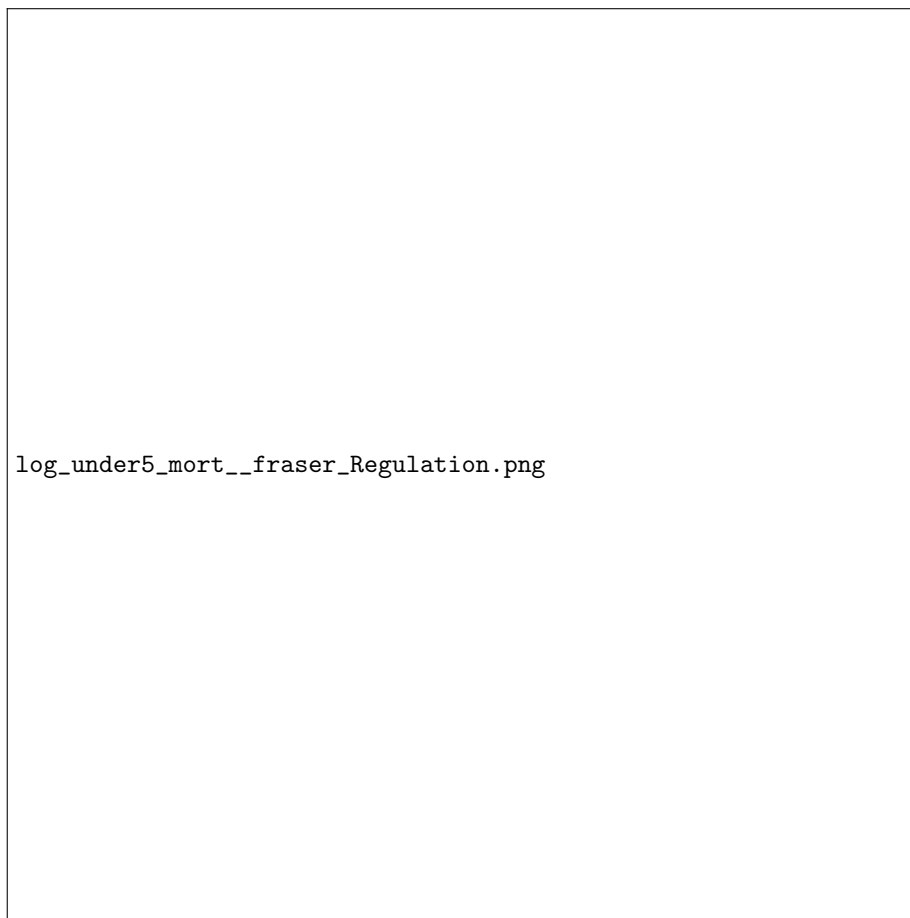

Figure 54: Event-study estimates: log under-five mortality; Fraser, regulation.

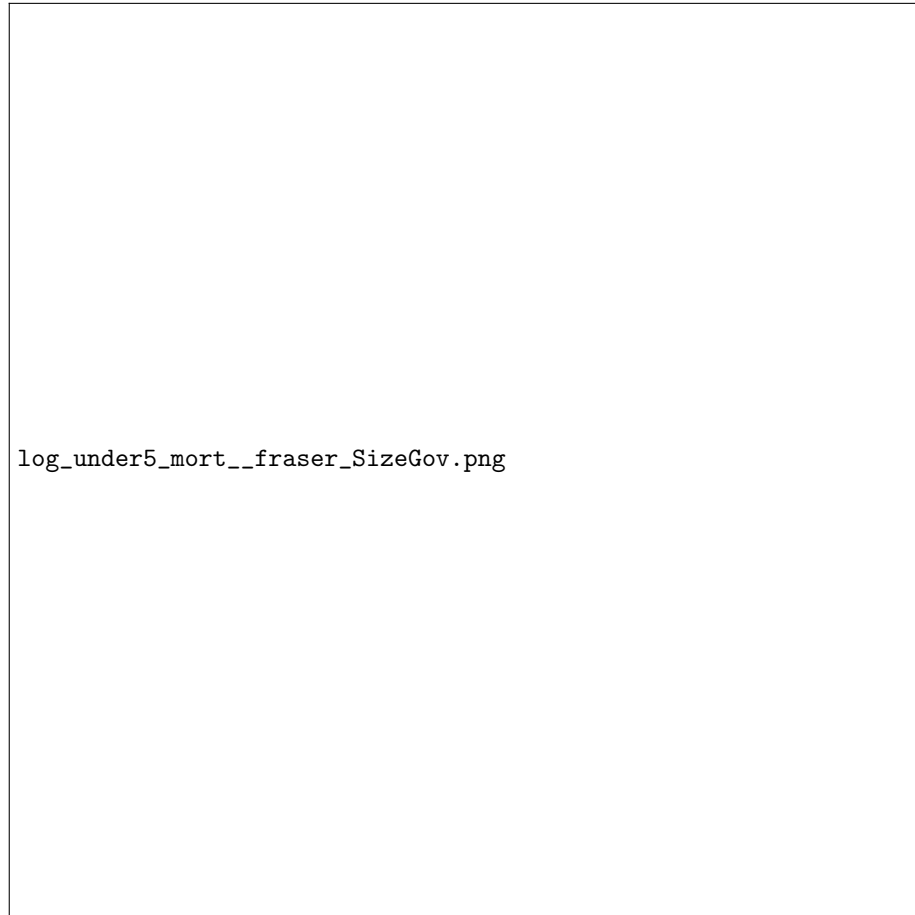

Figure 55: Event-study estimates: log under-five mortality; Fraser, size of government.

Figure 56: Event-study estimates: log under-five mortality; Fraser, sound money.

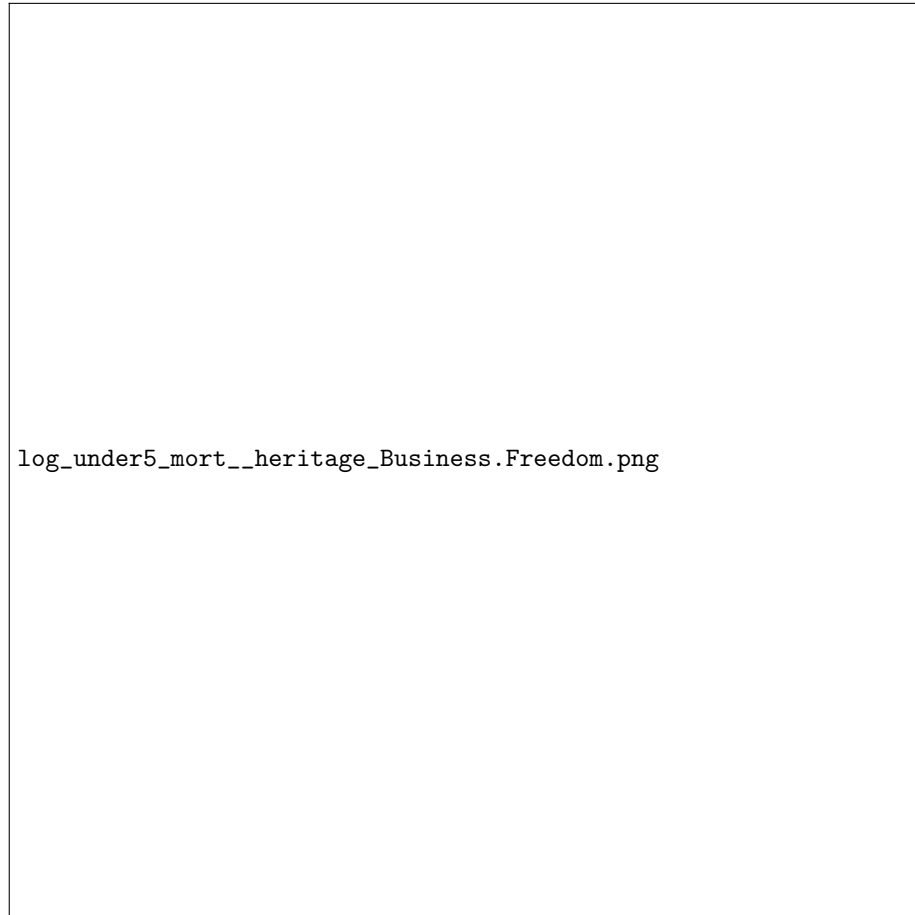

Figure 57: Event-study estimates: log under-five mortality; Heritage, business freedom.

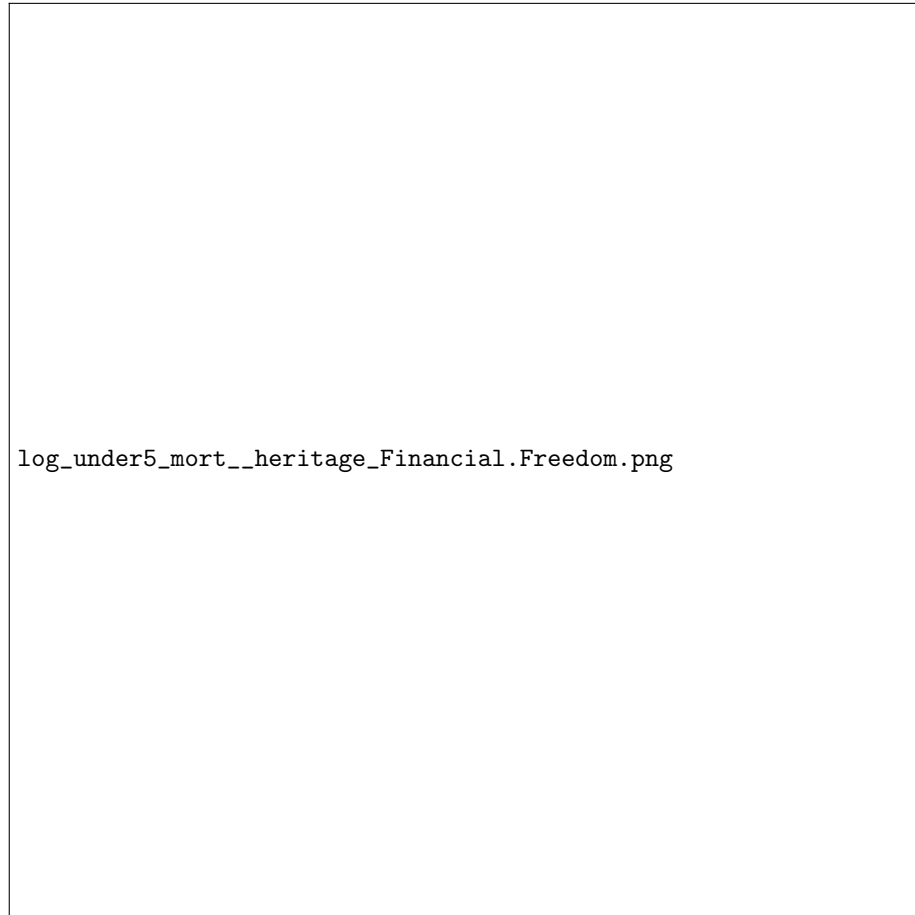

Figure 58: Event-study estimates: log under-five mortality; Heritage, financial freedom.
